EDUCATION

Pilar Colleges of Zamboanga City, Inc.

Zamboanga City, Philippines

B.S. in Information Technology

April 2021 – April 2025

- **Concentrations:** Software Engineering and Full-Stack Development
- **Honors:** Proficiency Award (OWWA Internship)
- **Related Coursework:** Software Engineering, Web Development, Database Management, System Analysis & Design, API Development, Systems Integration

EXPERIENCE

Alt Business

Zamboanga Peninsula, Philippines

Senior Information Technology Specialist

Mar 2026 – Present

- Lead the development and management of full-stack business applications, company websites, and digital platforms supporting organizational growth and scalability.
- Architect and implement modern web solutions using React.js, TypeScript, and Next.js while overseeing backend integrations and API services.
- Drive technical decision-making focused on clean architecture, reusable components, maintainability, and long-term scalability.
- Improve platform performance, user experience, and development workflows across multiple software initiatives.
- Collaborate with teams and stakeholders to deliver scalable and business-driven digital solutions.

IT Associate Independent Contractor

Oct 2025 – Mar 2026

- Managed and supported multiple software and website projects for business operations.
- Developed frontend and backend features including dashboards, CMS functionality, and workflow-driven systems using React, Next.js, and TypeScript.
- Integrated APIs and backend services to streamline internal operations and improve system efficiency.
- Assisted in troubleshooting technical issues and implementing scalable software solutions aligned with business requirements.
- Maintained application stability and optimized system functionality across projects.

Web Developer

Jun 2025 – Sep 2025

- Developed and maintained responsive company websites and internal business web applications.
- Built reusable UI components and interactive interfaces using React and TypeScript.
- Ensured cross-device compatibility, responsiveness, and frontend performance optimization.
- Collaborated with teams to integrate APIs and improve overall website functionality.
- Focused on writing clean, maintainable, and scalable frontend code.

Overseas Workers Welfare Administration (OWWA)

Zamboanga City, Philippines

Software Developer Intern

Jan 2025 – Jun 2025

- Developed an Inventory Management System using Python to automate inventory and asset tracking workflows.
- *Designed database structures and backend logic for accurate record management and reporting.*
- *Collaborated with staff to gather system requirements and translate operational workflows into digital solutions.*
- *Improved operational efficiency by reducing manual handling and centralizing inventory processes.*
- *Assisted in troubleshooting and maintaining technical systems during deployment and implementation.*

PROJECTS

Multi-Organization Employee Time & Attendance Management System

Personal Project

Full-Stack Developer

2025 – Present

Repository: [attendance-tracking-system](#)

- Developed a multi-tenant SaaS attendance management platform with secure employee time tracking and photo verification.
- Built a cross-platform mobile application using React Native and Expo for employee attendance logging and history tracking.
- Developed an admin dashboard using Next.js and TypeScript for employee management, reporting, and attendance verification.

- Implemented PostgreSQL Row Level Security (RLS) for strict organization-based data isolation and secure multi-tenant architecture.
- Integrated Supabase Authentication, PostgreSQL database services, and cloud storage with access policies and signed URLs.
- Designed scalable backend workflows using JWT authentication and role-based access control.
- Applied structured testing approaches using Jest and property-based testing methodologies.

Real-Time Web Chat Application

Personal Project

Developer

April 2024

- Developed a real-time chat platform with user authentication and session management.
- Implemented frontend-backend communication for dynamic live messaging functionality.
- Designed responsive interfaces and optimized real-time user interactions.

Inventory Management System

Internship Project

Developer

2025

- Developed an inventory and asset tracking system to automate monitoring and reporting processes.
- Designed backend logic and database workflows to improve data organization and accessibility.
- Improved accuracy and efficiency of inventory management operations through digitalization.

ACTIVITIES AND LEADERSHIP

Zamboanga Youth Movement Association (Sports)

Zamboanga City, Philippines

Executive Director

2024 – 2025

- *Led sports-related youth initiatives and coordinated community engagement activities.*
- *Organized programs promoting leadership, teamwork, and active participation among youth members.*

SKILLS

Programming & Development: Java, PHP, VB.NET, JavaScript, TypeScript, HTML, CSS, React.js, Next.js, React Native

Backend & Databases: Django, Flask, REST APIs, MySQL, PostgreSQL, Supabase

Tools & Platforms: Git, Vercel, Expo, VS Code, PyCharm

Core Competencies: Full-Stack Development, System Design, API Integration, Multi-tenant Architecture, Database Management, Responsive Web Development

SEMINARS & TRAININGS

- Cyber Security SOC Level 2 (2024)
- Introduction to Node.js: A Backend Development Framework (2024)
- Operating System Basics (2024)
- ATOMIC DESIGN: Breaking the Designer-to-Developer Gap through Design Systems – Figma (2023)
- Creating User Interface with Adobe XD (2023)
- Web Development Seminar (2022)
- Deep Learning with Python (2022)
- IT Seminars – Pilar College of Zamboanga City, Inc. (2021–2024)

ACHIEVEMENTS

- Champion – Chess Competition, Palaro SY 2023–2024
